EDUCATION

Ontario Tech University

Bachelor of Engineering - Software Engineering (2023 – Present)

- President's Honour List
- Relevant Courses: Data Structures & Algorithms, Intro. to A.I., Operating Systems, Computer Networking, Statistics and Probability
- Current GPA: 3.81

SKILLS & QUALIFICATIONS

Languages: JavaScript, Java, TypeScript, HTML, CSS, PHP, Python, C++, C, Perl, MySQL, SQLite, PostgreSQL

Libraries & Tools: TailwindCSS, ReactJS, NextJS, React Bits, MagicUI, SQLAlchemy, Uvicorn, Supabase, MongoDB, MariaDB, Langchain, Langgraph, Langfuse, MSW, TanStack Table, EffectTS, Sentry, Postman, DVC, DuckDB

Platform: Node.js, Github, GitLab, HuggingFace, Figma, RESTfulAPIs, Cisco Packet Tracer, Kubernetes, Docker, Jenkins

PROJECTS

Student-Life Management Platform

Sept, 2025 – present

Typescript, TailwindCSS, Javascript, MySQL, React, Next

- Developing a one-stop student life management platform that supports note, schedule and grade management utilizing MySQL to optimize user data management.

Rule-based Chatbot

March, 2026

Python, NLTK, React

- intent detection, field extraction for reservations/delivery, and a self-learning memory layer that promotes new vocabulary over repeated observations

Battery SOH Chatbot Application

December, 2025

Python, Pandas

- Developed a chatbot application that answers a user's query based on given battery data. Applied knowledge on data structure to train linear regression model with 21 cells battery pack data and optimize battery SOH prediction.

ML Papers Pipeline

May, 2025

Python, Gemini API, Arxiv API, Discord SDK, YAML, GitHub Actions

- Used Python to develop and run a pipeline, which automatically evaluated and summarized machine learning papers; optimized JSON index and updated a knowledge store of paper URLs, allowing a \$0 deployment of the pipeline with minimal API calls. Collaborated to connect the pipeline to a Discord webhook publishing daily posts.

EventSphere

December, 2024

HTML, CSS, JavaScript, PHP, MySQL

- Developed a stateful event management platform by implementing database fetch/write mechanisms in PHP and optimizing queries with indexed lookups, improving database performance by 30%.

VOLUNTEER EXPERIENCE

Event Volunteer, Taste of Asia 2022, Markham, ON

July, 2022

- Listened patiently to visitors' queries and provide assistance to create a satisfied and comfortable experience
- Collaborate with other volunteers and leaders in stage and booth setups to help the event run smoothly
